

## ABOUT OUR CLIENTS

Whether you're starting up your own business, expanding an existing one or you're a corporate client changing the way you operate, LANZen has something innovative to offer. Here are just a few of our clients

- 1. BANKING** Many strategic and special projects such as biometric authentication, web portals, information storage and disaster recovery.
- 2. JAMIE OLIVER** LANZen designed a fully wireless infrastructure for Jamie Oliver's Restaurant, "Fifteen" in London.
- 3. LOCAL BUSINESSES AND START UPS** Accountants, estate agents, restaurants, manufacturing and b2b suppliers. Everything needed to get a new venture off the ground to web-enabling existing businesses.

## SO WHAT CAN LANZEN OFFER?

It's not just about computer systems, it's about information solutions. We take the way you want to work and place the business information you need at your fingertips. Helping you be more efficient, make the right decisions and be more profitable.

LANZen has an ethical working policy. We reserve the right not to work with those who abuse the rights of others - even if it means losing a valuable contract.

Secure Computer Information Solutions

## My success is based on the quality of the decisions I make. So how can LANZen help me?

By making sure that you always have the right information to make those decisions. We design IT systems that will place your latest business information at your fingertips – wherever you go.

### From the desktop to the web - Making the Internet an extension of your office.

Maybe you've looked at web - enabling your business in the past, but were put off by the cost and complexity of what was offered. We appreciate that the disruption such a move can cause is often counter productive.

LANZen can show you how by using middleware, all of your existing systems – Microsoft, UNIX or Linux – can be placed into a browser – any browser - in a matter of a few days. And all without changing one bit of code on any of your existing systems.

**Human engineering** When you log on to your system, it should be easy yet secure. In the past, we have always relied on passwords to protect us – yet they can be stolen, lost or forgotten. We can show you easy, innovative ways to access everything you need for your business – securely.

**We value your privacy** and that extends to when you are travelling away from your office. Discover an easy, highly secure way to use the Internet to reach your office from wherever you go, virtually anywhere in the world!

**Self defence** it's essential to have a plan to protect your business from what the world might throw at it – fire flood or terrorist attack – your business will be safe with a LANZen disaster recovery plan!

“LANZen provides an end to end solution – everything your business needs for information management – because information is everything.”

### 1 Information access

Businesses are realising that customers don't come to them anymore – they must go to the clients. Wherever your business takes you, we can ensure that you have rapid, secure and easy access to everything you need, wherever you go in the world.

### 2 Information management

Stored data will have quadrupled by 2006. Yet only 20% of it is active. We can show how to implement a storage policy to manage your data so the right information is always right there for you when you need it.

### 3 Information storage

Information storage is your biggest system cost. As the information within your business grows, the space it consumes expands, too. We can show how to contain this efficiently and safely.

### 4 Information security

Protecting your data from damage and keeping it secure for legal retention purposes is vital. We know about protecting every size of business from virtually any disaster that may strike it in the future.

Now you've got the information you need to make a great business decision - call LANZen!
